EDUCATION

University of Chile 2022 — Present
B.Sc. Industrial Engineering (Minor in Computer Science and Data Science) *Santiago, Chile*
• Academic Excellence Award (2023–Present) | Currently pursuing Master's in Data Science (concurrent studies)

WORK EXPERIENCE

Teaching Assistant — Data Mining Aug 2026 — Present
Department of Computer Science (DCC), University of Chile *Santiago, Chile*
• Assisted in grading computational laboratories and tests.

Teaching Assistant — Foundations of Generative AI Aug 2026 — Present
Department of Industrial Engineering (DII), University of Chile *Santiago, Chile*
• Assisted in grading and reviewing computational assignments with explanatory videos.

Data Analyst — Internship Jan 2026 — Mar 2026
PIRIS *Remote*
• Built an ETL pipeline (Google Apps Script → Jira API → BigQuery) to automate data extraction and KPI computation.
• Modeled starschema tables and deployed a Looker Studio dashboard for real-time operational tracking.

Teaching Assistant — Probability 2024 — 2025
Department of Industrial Engineering (DII), University of Chile *Santiago, Chile*
• Assisted in designing and grading computational assignments, tests and exams

Volunteer Mar 2024 — Aug 2024
Centro Educacional Municipal Mariano Latorre *Santiago, Chile*
• Coordinated with leadership to organize student activities and collaborative community projects

PROJECTS

Aldous (Personal Hermes Agent) 2026 - Present
• Deployed and maintain a personalized AI agent on an Oracle Cloud Ubuntu server to assist with daily workflows

SLEP Medical License Dashboard (adolforv.github.io/repositorio-SLEP/migrador.html) Autumn 2026
• Developed a zero-server ETL tool (Quarto + Pyodide/WASM) that normalizes years of inconsistent data into a starschema.
• Automated fuzzy-matching and regex cleansing, cutting manual data prep by 90%; outputs feed a Power BI template with automated alerts.

U-Clases Spring 2025
• Developed a scalable Django and Tailwind platform connecting students for tutoring sessions

ViviendaVision.cl (adolforv.github.io/ViviendaVision) Spring 2024
• Developed a functional prototype with an OpenAI-integrated chatbot for housing subsidy validation

Final Fantasy–style Game Spring 2024
• Designed in Scala for a Software Design course, applying software engineering best practices

SKILLS

- **Professional:** Analytical, meticulous, self-taught, resourceful, collaborative, quality-driven
- **Languages:** Python, R, SQL (Access, MySQL, PostgreSQL), NoSQL (MongoDB), Scala, C
- **Data Science:** Polars, Pandas, NumPy, Scikit-learn, PyTorch, LangChain
- **Data Tools:** Power BI, Looker Studio, Google BigQuery, Excel (Advanced, Macros), Google Apps Script, Bizagi
- **Dev & Tools:** FastApi, Django, Docker, Oracle Cloud, Git, Linux

LANGUAGES

- Spanish (Native), English (B2 TOEFL ITP 607/677), French (B1)
